

The logo for Tencia, featuring the word "tencia" in a red, lowercase, serif font with a trademark symbol (TM) to the upper right. A thin red horizontal line is positioned above the letters "e" and "n".

Multi Company

For organisations that have more than one company operating, the Multi-Company feature in Tencia has been developed to assist and streamline the creation and optional consolidation of these companies.

Tencia Multi-Company features:

- When creating new companies it is possible to copy the Chart of Accounts and Financial Reports from an existing company.
- This Multi-Company option allows you to optionally consolidate general ledger balances from nominated companies. This can be done for all companies created or by selecting specific companies for the consolidation process.
